FIELD ASSET AUDIT
Agile field data solutions with
PortAir™

Hydrometrix is an established specialist in the provision of field asset auditing and data gathering using its proprietary PortAir™ data management platform.
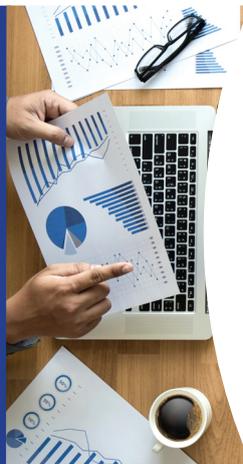

We offer fully-staffed, end-to-end solutions across multiple industries throughout South and Sub-Saharan Africa. Our teams are professionally trained and equipped with the latest in rugged mobile, GPS, barcode and camera technologies.

Our PortAir™ mobile app ensures that time-stamped attribute data is gathered systematically, accurately and directly to a web data portal. We can therefore deliver centralised, accurate and comprehensive asset intelligence that is immediately available to our clients. Primary benefits include dramatic savings in cost, while increasing the efficiency, accuracy and value of field asset audits and field data collection services.

PortAir™ and cloud data hosting is also available as a Software-as-a-Service (SAAS) solution for in-house data collection.

Application

- Asset attribute data collection
- Field surveys
- Billing database & asset register verification
- Water & electricity meter audits
- Property inspections
- Compliance inspections
- Door-to-door surveys

Key Benefits

- Fully staffed data solution or Software-as-a-Service solution
- Configurable app for any data set capture
- Intuitive user interface
- Secure cloud data hosting
- Enterprise-wide data availability
- Utmost data integrity
- Seamless paper to digital transformation

Experience and Track Record

> 100 000 electricity meter audits
> 55 000 water meter audits
> 3 200 000 field data attributes collected

International assignments in Namibia
